ABOUT US

Ino Tech Laser is your single source for virtually any laser materials processing application. From R & D to production, our engineering and technical staff can handle your requirements. The Ino Tech Laser engineering and service team provides custom LASER CUTTING, WELDING, DRILLING, MARKING and ABLATING services and can act as your precision component contract manufacturer. Our custom laser workstations house cutting edge laser technology and decades of engineering experience to meet precision and intricate designs. For laser welding, cutting, drilling, ablation and marking: Ino Tech Laser's vast applications experience and years of processing expertise has earned us the reputation as a complete outsourcing solution.

InoTech Laser is accustomed to providing tight tolerance laser cutting and processing of thin-wall tubular metal components, sub-assemblies and implants drilling, welding, marking and ablating solutions for a wide range of industries, fulfilling both prototype and production needs of our clients.

Laser Micromachining and Laser Manufacturing Services:

- Cutting
- Welding
- Drilling
- Ablation
- Marking

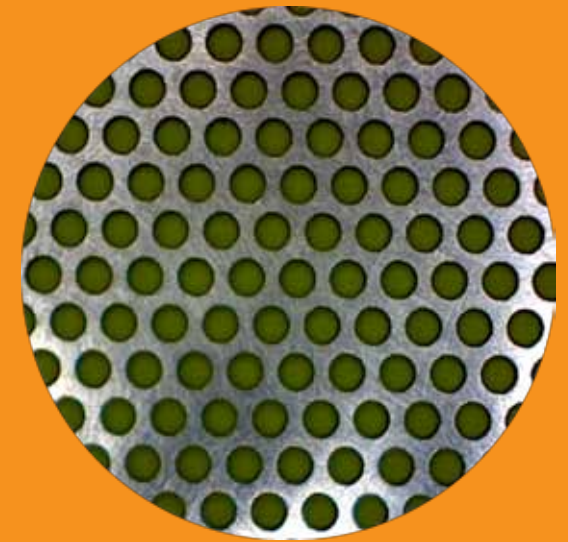

Processing expertise that spans many industries:

- Medical Device
- Semiconductor
- Solar
- Microelectronics
- Defense
- Telecom
- Safety & Security
- Aerospace
- Automotive
- Consumer Products

Benefits from working with Ino Tech Laser

- Capabilities in most processing applications
- Quick turn around time and very helpful service team
- Flexible production equipment
- Specialists in tight tolerance work
- Competitive pricing with prompt quotes and on-time delivery

At Ino Tech Laser, an ISO 9001:2008 certified manufacturing facility; we accept nothing less than exceptional quality and conformance to your requirements.
